Virtual Defense Using Zoom

In order to protect the privacy of an MSc defense via Zoom, please consider using any of the following suggestions to increase your privacy protection:

- **turn on your waiting room**, or designate a co-host to run your waiting room. You can also **view and admit participants** as they arrive. Again, you might want to **have someone else doing this as co-host**.

- An easy way to increase your privacy is by **setting up registrations for your Zoom defense**. This is a simply layer that attendees have to go through in order to get a meeting link. The host has access to the registration list live through the registration period.

We will no longer publish MSc defense notices that include meeting ID's and passwords.
